SADC STATISTICS TEMPLATE FOR TRADE IN SERVICES

Summary document

Introduction

These statistics templates have been developed to address SADC's need to improve the availability and quality of trade in services data including foreign affiliates statistics (FATS) to inform trade in services negotiations.

This summary document, the associated Excel workbook with two supporting documents on FATS and the WTO services negotiating list together set out the templates for trade in services and foreign affiliates statistics for common reporting to SADC. They also give some guidance to countries for national purposes including the collection of relevant statistics.

Background on SADC trade negotiations

Under the Protocol on Trade in Services, SADC Member States are negotiating the liberalisation of services trade in the region, as mandated by the SADC Committee of Ministers of Trade and Industry. The on-going negotiations are focused principally on six priority sectors namely:

- Construction
- Financial services (which includes Insurance)
- Energy-related services
- Communication
- Transportation services
- Tourism

Furthermore, some SADC Member States are negotiating trade in services with the European Union (EU) under the Economic Partnership Agreement (EPA). This involves four participating SADC EPA States namely: Botswana, Lesotho, Mozambique and Swaziland. The focus under EPA includes Business services in addition to the six SADC priority sectors.

The statistics templates are designed to provide a common tool for the collection and compilation of statistics on trade in services, including foreign affiliates service activities in the SADC region. The templates developed are meant for the use of all SADC Member States.

The Statistics Templates

There is a natural tension between trade negotiators' need for detailed information related to services sectors and statisticians' capacity to collect trade in services data systematically from commercial enterprises and individuals. These templates build on existing standard statistical frameworks to maximise the possibility of statistics authorities and indeed private sector respondents to provide the information requested in questionnaires.

These templates use the statistical framework of the balance of payments, in particular IMF's Balance of Payments Manual 6 (BPM6), which is in the process of being implemented around the world and in all the Member States of SADC, although at the time of writing only Seychelles among these has completed the migration to BPM6.

This balance of payments framework is elaborated for trade in services using the Manual on Statistics of International Trade in Services (MSITS 2010) and in particular using the Extended Balance of Payments Services Classification (EBOPS 2010). The use of MSITS 2010 is necessary to facilitate the collection of partner country information.

Regarding the commercial presence of foreign service suppliers, which is not covered in the balance of payments data, the templates use the Foreign AffiliaTes Statistics (FATS) framework set out in MSITS 2010, broken down by service sector and partner. FATS are divided into *inward* FATS, foreign affiliates operating in the domestic economy, and *outward* FATS, foreign affiliates abroad under the control of domestic companies.

There are three aspects to the templates. Firstly they set out clear guidance on a common data set that countries can report to SADC. Secondly they indicate certain additional information that might usefully be collected for national purposes related to trade in services negotiations. Thirdly there is some guidance on how to collect the common core data nationally including some model questions to be added to or adapted for national statistical inquiries. Here the templates draw on existing national questionnaires such as UK ONS for trade in services and Zambia for FATS (in combination with a foreign direct investment survey) and the draft Compilers Guide currently being prepared by WTO, IMF, UNSD, and others.

The common core templates aim to provide a picture of the main components of trade in services in SADC countries with partner countries and groups such as SADC, EU, as well as with other key partners including COMESA, and EAC, and the World. Detail is expanded in the priority sectors as far as is practical in terms of availability of data.

The Common Core Templates for Reporting to SADC

The templates setting out the common core statistics are in three parts as follows:

- 1. Balance of payments trade in services statistics by partner country
- 2. Inward foreign affiliates statistics by partner country
- 3. Outward foreign affiliates statistics by partner country

Partner country dimension

The partner country dimension is common to all three parts of the common core templates. The list is drawn up from a SADC perspective and is an exhaustive list of countries starting with the SADC Member States, identifies the other members of the Tripartite process (COMESA and EAC), and the European Union with whom some Member States are negotiating trade in services agreements.

The full partner country list is attached as Annex B1.

Balance of payments trade in services statistics by partner country

This part of the common core templates uses selected EBOPS 2010 services items from MSITS 2010 to measure resident – non-resident trade in services by partner country. Five other dimensions are reporting country; time period (year or

year/quarter); flow (exports or imports); units of value (in terms of National currency units or US Dollars); and metadata (textual information about the data). Together this makes a seven dimensional dataset. The template is presented below and in Annex B2.

The seven fields or dimensions then are:

- a: Reporting country
- b: Time period: Year or year quarter
- c: Flow: Exports or imports
- d: Value unit: Thousand National currency units or Thousand US Dollars
- e: EBOPS 2010 common items:

EB	OPS 201	0 Codes	EBOPS 2010 Descriptions
1			Manufacturing services on physical inputs owned by others

g: Metadata: (Descriptive information SADC would need about the statistics reported will be determined at the implementation stage of the template, when SADC begins the data collection process. It will focus on FATS and avoid unnecessary duplication of metadata on Balance of Payments that is collected by IMF. It needs to align with international metadata reporting standards. For trade in services it would include information such as: name of Survey officer (country contact); institution(s)

responsible for Trade in services data collection; whether the data are published and where).

Inward foreign affiliates statistics by partner country

This part of the common core templates uses selected International Standard Industry Classification (ISIC 4) activities by partner country and recommendations from MSITS 2010 in Chapter 4 on foreign affiliates statistics. Other dimensions are reporting country; time period (year); variables (number of *resident* enterprises, sales or output, employment); units of value (in terms of National currency units or US Dollars); and metadata (textual information about the data). Together this makes a seven dimensional dataset. The template is presented below and in Annex B4.

The 7 fields or dimensions then are:

a: Reporting country

- b: Time period: Year
- c: Variables: Number of Enterprises, Sales, Output, Employment
- d: Value unit: Thousand National currency units or Thousand US Dollars
- e: ISIC 4 common industry items: Resident affiliate activity

The full country list is attached at Annex B1.

g: Metadata: (Descriptive information SADC would need about the statistics reported will be determined at the implementation stage of the template, when SADC begins the data collection process. It will focus on FATS and avoid unnecessary duplication of metadata on Balance of Payments that is collected by IMF. It needs to align with international metadata reporting standards. It would include information such as: name of Survey officer (country contact); institution(s) responsible for inward FATS data collection; name of survey; frequency of survey; any size cut-off threshold; response rate; description of estimation of non-response; deviations from MSITS FATS recommendations; are the data published and where.

Outward foreign affiliates statistics by partner country

This part of the common core templates uses selected International Standard Industry Classification (ISIC 4) activities by partner country and recommendations from MSITS 2010. It may be more difficult for statistics offices to precisely evaluate the industrial activity of non-resident enterprises controlled by resident enterprises, so the selected list of industries is slightly simplified, as only the resident enterprise can be directly surveyed.

Five other dimensions are: reporting country; time period (year); variables (number of *non-resident* enterprises, sales or output, employment); units of value (in terms of National currency units or US Dollars); and metadata. Together then this makes a seven dimensional dataset. The template is presented below and in Annex B5.

The seven fields or dimensions then are:

- a: Reporting country
- b: Time period: Year
- c: Variables: Number of non-resident enterprises, Sales or Output, Employment
- d: Value unit: Thousand National currency units or Thousand US Dollars
- e: ISIC 4 common industry items:

The full country list is attached at Annex B1.

g: Metadata: (Descriptive information SADC would need about the statistics reported will be determined at the implementation stage of the template, when SADC begins the data collection process. It will focus on FATS and avoid unnecessary duplication of metadata on Balance of Payments that is collected by IMF. It needs to align with international metadata reporting standards. It would include information such as: name of Survey officer (country contact); institution(s) responsible for outward FATS data collection; name of survey; frequency of survey; are affiliates of foreign

controlled resident firms included; response rate; description of estimation of nonresponse; deviations from MSITS FATS recommendations; are the data published and where.

Templates contents

The statistics templates package contains apart from this summary note:

Annex B1 SADC List of partner countries and country groups

Annex B2 BOP services by partner

Annex B3 ISIC Activities

Annex B4 Inward FATS industry by partner

Annex B5 Outward FATS industry by partner

Annex B6 Variables for FATS

Annex B7 FATS compilation definitions

Annex B8 Example questions BOP

Annex B9 Example questions FATS

Annex B10 Modes correspondance table

Annex B11 GNS W 120 services list

a/ The designations employed and the presentation of country or area names in this list do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. The user of any particular dataset should consult the dataset documentation to determine the exact coverage of statistics for the country or area entities in the dataset. Various datasets may or may not include coverage of outlying and overseas areas, depending on the type of data and source.

Balance of Payments Trade in Services by Partner Country

FATS Compilation Definitions

FATS COMPILATION

There are two basic approaches to developing statistics on foreign affiliates, which are not necessarily mutually exclusive. The first approach entails conducting surveys that request information directly on the operations of resident affiliates of foreign enterprises and foreign affiliates of domestic enterprises. The first approach may be an extension of or related to investment surveys. This is illustrated in an example FATS/FDI questionnaire from Zambia attached in document D.

The second approach, which can be used only for inward investment, identifies the subset of existing data on resident enterprises that are foreign-controlled enterprises.

MAIN FATS DEFINITIONS (Drawn from OECD FATS definitions)

Control

The notion of control for an enterprise implies the ability to appoint a majority on board of directors to run the enterprise, guide its activities and determine its strategy. This ability is exercised by a single direct investor or a group of associated shareholders acting in concert and controlling the majority (more than 50%) of ordinary shares or voting power.

The data requested relate to **majority foreign-controlled** affiliates and to **majority-controlled** foreign affiliates of domestic firms.

Direct and indirect control

A company A which possesses the majority of ordinary shares or voting power in a company B is considered to have direct control of that company. For example, if company A controls 70% of the shares of company B and company B in its turn controls 60% of the shares of company C, company A has indirect control over company C via its control over company B, even though it does not directly possess a majority of shares in company C.

Ultimate control enterprise (ultimate controlling institutional unit - UCI)

An investor (company or individual) is considered to be the ultimate control investor if it is at the head of a chain of companies and directly or indirectly controls all the enterprises in the chain without itself being controlled by another investor.

The data requested for both inward and outward activity should be compiled according to the ultimate controlling institutional unit concept.

Target population for inward investment

The target population comprises all enterprises and all branches under foreign control.

Target population for outward investment

The target population of **statistical units** is composed of all foreign affiliates that are controlled (directly or indirectly) by residents of the compiling country.

The target population of **reporting units** is composed of all resident parent companies. Affiliates of parent companies under foreign control (*e.g.* regional headquarters) should be included in the population of reporting units.

Target population for parent companies controlled by residents of the compiling country

The target population is composed of the reporting units used to compile the outward investment data.

Parent company

There are two possible situations:

a) Parent company controlled by residents of the compiling country

From the point of view of a compiling country, the parent company of foreign subsidiaries is the consolidated enterprise consisting of (i) the domestic enterprise which invests abroad but which no domestic or foreign enterprise controls (by majority stake) and (ii) all domestic firms in which the preceding firm or person controls directly or indirectly.

In the example given in the following figure:

Country 1

The parent of companies F, G and H is the consolidated enterprise (group) in Country 1 consisting of companies X, A, B and C. Enterprise C is included in the

group since B, which is majority-controlled by X, has direct control of C.

Company D is not included in the group since X has only a minority ownership of D, which might be an independent enterprise or part of another group.

In this case, the resident parent company (consisting of companies X, A, B and C) is the UCI.

34

b) Parent company under foreign control

In the above example, company A in compiling country 1 is controlled by company B in country 2, whereas company A controls company C in country 3. In this case, company A is the parent company of company C, while company B is the parent company of company A and the ultimate controller of companies A and C.

In this case, the resident parent company is not the UCI.

Statistical unit

The information concerning the statistical unit may be collected either by *enterprise* or by *establishment*.

An *enterprise* is an autonomous legal entity that is required to draw up a balance sheet and profit and loss statements. It may consist of one or various production units belonging to the same owner(s).

By establishment is meant a combination of activities carried out by a single entity with a view to producing as homogeneous as possible a set of goods and services, in respect of which it is possible to collect separate data about production, inputs, labour and capital.

The basic unit chosen should be clearly indicated. Also, when the exact number of enterprises (or establishments) and the values of the other economic variables cannot be provided by sector, the percentage of firms in each of the three categories of foreign control should be estimated.

Industrial classification

The classification used is ISIC Revision 4.

Definition of economic variables

1. Number of enterprises

The statistical units correspond essentially to three levels of production:

The **establishment**, as defined in the System of National Accounts (SNA 2008), is an enterprise, or part of an enterprise, that is situated in a single location and in which only a single productive activity is carried out or in which the principal productive activity accounts for most of the value added. This entity is also called a "local kind-of-activity unit" (local KAU). The establishment theoretically has no legal autonomy, but this is not necessarily true as there are many single establishment firms that have legal autonomy, while its accounts contain all information relating to such factors as employment, gross value of production and

intermediate consumption, apart from overheads, which are reported in the enterprise's accounts.

An *enterprise* is defined as "an institutional unit [...] producer of goods and services. The term enterprise may refer to a corporation, a quasi-corporation, a non-profit institution or an unincorporated enterprise" (SNA 2008, §5.1).

The *enterprise group* is an "association of enterprises bound together by legal and/or financial links. A group of enterprises can have more than one decision-making centre, especially for policy on production, sales and profits. It may centralise certain aspects of financial management and taxation". Its activities may be in the industrial, service or banking sectors, and sometimes concurrently in two or all three (conglomerates). It may be located within a country (in which case it is a domestic group) or, as is more commonly the case, in several countries (multinational group).

The statistical unit chosen should be clearly indicated. The most relevant unit may vary depending on the variable in question. For example, gross operating surplus (but also R&D or technology receipts and payments), should be collected at the enterprise level only, while intra-firm exports or imports can be collected only at the enterprise group level.

2a. Number of employees

Persons who work for an employer (corporate enterprise or sole proprietorship) and who have a contract of employment and receive compensation in the form of wages, salaries, fees, gratuities, piecework pay or remuneration in kind.

The relationship of employer to employee exists when there is an agreement, which may be formal or informal, between an enterprise and a person, normally entered into voluntarily by both parties, whereby the person works for the enterprise in return for remuneration in cash or in kind.

A worker is considered to be a wage or salary earner of an observation unit if he or she receives a wage or salary from the unit regardless of where the work is done (in or outside the production unit). A temporary worker is considered to be an employee of the temporary employment enterprise and not of the production unit (customer) in which he works.

In particular the following are considered as employees:

- owners of corporations and quasi-corporations if they work in these enterprises; students who have a formal commitment whereby they contribute to the enterprise's process of production in return for remuneration and/or education services;
- homeworkers if there is an explicit agreement that the homeworker is remunerated on the basis of the work done and they are included on the pay-roll.

The number of employees includes part-time workers, seasonal workers, persons on strike or on short-term leave, but excludes those persons on long-term leave. These statistics may be collected:

- as an annual average
- as a snapshot statistic at a given date.
2b. Number of persons employed in full-time equivalent units

The number of employees converted into full-time equivalents (FTE). Figures for the number of persons working less than the standard working time of a full-year full-time worker should be converted into full-time equivalents, with regard to the working time of a full-time full-year employee in the unit.

Included in this category are people working less than a standard working day, less than the standard number of working days in the week, or less than the standard number of weeks/months in a year. The conversion should be carried out on the basis of the number of hours, days, weeks or months worked.

2c. Number of persons employed

The number of persons employed is defined as the total number of persons who work in the observation unit (inclusive of working proprietors, partners working regularly in the unit and unpaid family workers), as well as persons who work outside the unit who belong to it and are paid by it (*e.g.* sales representatives, delivery personnel, repair and maintenance teams). It includes persons absent for a short period (e.g. sick leave, paid leave or special leave), and also those on strike, but not those absent for an indefinite period. It also includes part-time workers who are regarded as such under the laws of the country concerned and who are on the payroll, as well as seasonal workers, apprentices and home workers on the payroll.

The number of persons employed excludes manpower supplied to the unit by other enterprises, persons carrying out repair and maintenance work in the enquiry unit on behalf of other enterprises, as well as those on compulsory military service.

Unpaid family workers refer to persons who live with the proprietor of the unit and work regularly for the unit, but do not have a contract of service and do not receive a fixed sum for the work they perform. This is limited to those persons who are not included on the payroll of another unit as their principal occupation.

3. Sales or Turnover

Definition

Sales or Turnover comprises the totals invoiced by the observation unit during the reference period, and this corresponds to market sales of goods or services supplied to third parties. These sales may be included in accounts under the headings "net turnover" or "other operating income".

Turnover includes all duties and taxes on the goods or services invoiced by the unit with the exception of the VAT (or sales tax) invoiced by the unit vis-à-vis its customer and other taxes directly linked to turnover. It also includes all other charges (transport, packaging, etc.) passed on to the customer, even if these charges are listed separately in the invoice. Reduction in prices, rebates and discounts as well as the value of returned packing must be deducted, but not cash discounts.

Turnover does not include sales of fixed assets. Operating subsidies received from public authorities are also excluded.

For the statistics on insurance activities, it is proposed to collect gross premiums written as a substitute for turnover.

Gross premiums written shall comprise all amounts due during the financial year in respect of insurance contracts regardless of the fact that such amounts may relate in whole or in part to a later financial year, and shall include *inter alia*:

(i) premiums yet to be written, where the premium calculation can be done only at the end of the year;

(ii) - single premiums, including annuity premiums,

 in life assurance, single premiums resulting from bonus and rebate provisions in so far as they must be considered as premiums on the basis of contracts and where national legislation requires or permits their being shown under premiums;

(iii) additional premiums in the case of half-yearly, quarterly or monthly payments and additional payments from policyholders for expenses borne by the insurance undertaking;

(iv) in the case of co-insurance, the undertaking's portion of total premiums;

(v) reinsurance premiums due from ceding and retroceding insurance undertakings, including portfolio entries, after deduction of:

- portfolio withdrawals credited to ceding and retroceding insurance undertakings, and

cancellations.

For the statistics on pension funds activities, the corresponding title of this characteristic is 'Total pension contributions". This characteristic shall comprise all pension contributions, due during the financial year, in respect of pension contracts, such as all mandatory contributions, other regular contributions, voluntary additional contributions, incoming transfers, other contributions.

4. Gross Output

The output value is defined as turnover or revenue from sales of goods and rendering of services, plus or minus the changes in stocks of finished products, work in progress and goods and services purchased for resale, minus the purchases of goods and services for resale (only for the goods and services sold during the reporting period and excluding the costs of storage and transport of the goods purchased for resale), plus capitalised production, plus other (operating and extra-ordinary) income (excluding subsidies). Income and expenditure classified as financial or as revenue in the form of interests and dividends in company accounts is excluded from production value. Included in purchases of goods and services for resale are the purchases of services purchased in order to be rendered to third parties in the same condition.

For the statistics on activities of ISIC Rev.4 groups 65.1 and 65.2, the output value is defined gross premiums earned plus total portfolio investment income plus other services produced minus gross (expected) claims incurred, excluding claims management expenses plus capital gains and provisions.

For the statistics on credit institutions activities, the production value is defined as interest receivable and similar income less interest payable and similar charges plus commissions receivable plus income from shares and other variable-yield securities plus net profit or net loss on financial operations plus other operating income.

For the statistics on pension funds activities, the production value is defined as turnover less insurance premiums payable plus investment income plus other income plus insurance claims receivable less total expenditure on pensions less net change in technical provisions.

For the enterprises of the ISIC Rev.4 class 64.11 (central banks), the production value is defined as interest receivable and similar income less interest payable and similar charges plus commissions receivable plus income from shares and other variable-yield securities plus net profit or net loss on financial operations plus other operating income.

An example of a combined direct investment and FATS questionnaire is of note from Zambia. This questionnaire also meets the needs of the IMF Coordinated Direct Investment Survey (CDIS). Selected questions adapted from the Zambian questionnaire are included in Annex B9. For further information about CDIS including the statistics see: http://www.imf.org/external/np/sta/cdis/index.htm .

Example questions on trade in services by partner country

Example Trade in services (EBOPS questions) for a business survey

Below is an extract from a UK ONS trade in services questionnaire aimed at businesses (excluding transport and financial services firms). It may also be useful to consider if some of the information by partner country can be obtained by adapting an ITRS.

		Income from Exports	Expenditure on imports
Service C	ode Service Activity	Currency u (e.g. 1000	
SA	Manufacturing services on goods owned by others		
	For imports:		
	Include the fees charged by foreign businesses for the processing, assembly, labelling and packing of goods overseas that are owned by your business.		
	For exports:		
	Include services provided by your business for the processing, assembly, labelling and packing of goods overseas that are owned by a foreign business		
SB	Maintenance and repair services		
	Exclude the value of parts and material supplied by the repairer, if they are invoiced separately from the charge for the maintenance and repair service.		
	For imports:		
	Include the fees charged by foreign businesses for maintenance and repair work on goods owned by your business.		
	For exports: Include maintenance and repair work on goods that are owned by foreign residents		
SE	Construction Services		
	Construction covers the creation, renovation, repair, maintenance or extension of fixed assets in the form of buildings, land improvements, and other such engineering constructions as roads, bridges and dams.		

Exclude construction where an independent subsidiary, branch, or an overseas accounting or banking facility is set-up to run the project.

SE2 Construction in this country

For imports:

Include the total amount of expenditure by your business to a business abroad for construction in this country. Include:

any goods and services that are purchased in order to complete construction, regardless of country of origin.

For exports: Include (if known) the amount of goods and services that the business located abroad purchases whilst in this country, regardless of their origin to aid in the completion of construction. Exclude any labour purchased abroad

SE1 Construction abroad

For imports:

Include the value of goods and services, for example, bricks and engineering expertise purchased abroad by your business for construction abroad.

Exclude any labour purchased from the home country.

For exports:

Include the total amount of revenue received by your business for construction abroad. Include any goods and services that are purchased in order to complete construction, regardless of country of origin.

[SH For further guidance on construction calculation in trade in services see MSITS 2010 Chapter 3]

SH Charges for the use of Intellectual Property

sum of Aa + Ab+ Ba + Bb+ Ca+ Cb below

Trade marks, franchises, brands or design rights A trade mark is a sign that distinguishes your services from those of your competitors (you may refer to your trade mark as your 'brand'). It can be, for example, words, logos or a combination of both. A design right protects the overall visual appearance of a product or part of a product.

- A a) Outright sales and purchases of the above, resulting in transfer of ownership

Copyrighted literary works, sound recordings, films, television programmes and databases. Copyright can protect literary works, including novels, instruction manuals, song lyrics and newspaper articles. Dramatic, musical and artistic works might also be copyrighted. Copyrights may apply to technical drawings, architecture, diagrams, maps or logos. Please also include any computer programmes or databases that are copyrighted.

- a) Outright sales and purchases of the above, resulting in transfer of ownership
 - b) Charges or payments for the use of the above, but without transfer of ownership (also include here licences to reproduce or distribute software) . . .

Patents and other intellectual property that are the end result of research and development. Patents protect the features and the processes that make things work. Include outcomes of research and development that have a value but may not necessarily be patented.

- a) Outright sales and purchases of the above, resulting in transfer of ownership
- C b) Charges or payments for the use of the above, but without transfer of ownership

Telecommunications, Computer and Information Services

SI Services

В

В

С

SI1 Telecommunication services

Include the transmission of sound, images or other information by telephone, telex, facsimile or telegram, satellite, e-mail, radio and television broadcasting, business network services, teleconferencing and support facilities, mobile telecommunication services, internet backbone services, internet access and online access services. Exclude the value of any information transmitted, installation services for

telecoms equipment

SI2 Computer services

Include computer courses designed for a specific user

Exclude charges for licences to either reproduce or distribute software (code H000) and leasing of computers without an operator (Code J330)

SI3 Information services

Includes news agency, photographs, articles, publishing, database, web search portals and other information services

SJ Miscellaneous Business Services

Equals the sum of K100+K200+K300

Research	and	development
•		

SJ1 services

Provision of R&D services

Include work undertaken on a systematic basis to increase the stock of knowledge, provision of R&D services that are made to order, development of non-customised R&D, commercial research including those relating to electronics, pharmaceuticals, biotechnology and development of operating systems that represent technological advances.

Also include provision of product or process development and testing activities and any other service trade related to R&D that is not included above.

Includes sale of intellectual property rights arising from R&D

Exclude technical studies (K300) and consultancy work (include in code K200 consulting services)

SJ2 Professional and Management Consulting Services

= sum of legal, accountancy, business management and advertising

SJ211 Legal Services

SJ212 Accountancy, auditing, bookkeeping and tax consulting services

SJ213Business management and management consulting services:
Include advisory, guidance and operational assistance services provided to
businesses for business policy and strategy and overall planning and
control of an organisation

(include public relations services)

SJ22 Advertising, market research and opinion polling services

(also includes conference, trade fair and exhibition services)

SJ3 Technical, trade-related and other business services

Includes architectural, engineering, scientific and other technical services Includes waste treatment, depollution, agricultural and mining services Includes operational leasing services Includes recruitment, trade-related and other business services

Partner countries

We require a breakdown by partner country of the total value of each service exported from or imported to this country by your business, during the reporting period for each international service that your business conducted, write:

i) the service code (reported above)

ii) the partner country or countries that your business has exported from or imported to this country

- iii) the value exported by partner country
- iv) the value imported by partner country.

In the last row, write the total value of all your international trade in services.

Exclude tax both inside and outside this country.

		Partner	Income from Exports	Expenditure on Imports
	Service Code	Country	Report to the nearest 1,000 currency units	Report to the nearest 1,000 currency units
Example for Country X	SJ2	Kenya	20	35
	SE2	China		1950
		Total value of international trade in services	20	1985

N.B. If you believe that your country has very few main trading partners, then a simpler partner country form question might look like:

SI	Telecommunication	Income	from		Expenditure	on
51	services	exports		Total	imports	
				Country 1		
				Country 2		
				Country 3		
				Enter country name		

Tourism/Travel Some basic questions for an Exit Survey of travellers for Country X

1. What is your country of residence?

our nationality?

(If Country X then go to Q9)

2. What is your nationality?

3. Date of entry to Country X

4a. What was your main address during your stay in Country X?

4b. Was this a hotel, hotel apartment, private residential accommodation, campsite, nature reserve lodge, other (please describe)? ...

5a. What was the purpose of your visit to Country X? [Business,

Personal (Holiday, Visit relatives or friends, Education, Health, Other

- please state)]

5b. If your visit was for business, were you an employee of an employer in this country?

6. Was your visit part of a prepaid package holiday?

7. How much approximately did you spend on your visit to Country X? [..... Currency]

8. Describe your arrival journey to Country X from which country did you start your travel - and means of transport (if air - state airline)

Q9 a and 9b are only for residents of Country X

9a. What is your country of final destination on leaving Country X? And means of transport (if air - state airline)

9b. What is the purpose of your visit abroad [Business, Personal (Holiday, Visit relatives or friends, Education, Health, Other - please state)]

10. Date and signature

While values are needed for balance of payments, numbers of people are useful for tourism and other policy uses.

For national purposes a few additional questions on expenditure related to Q7 may be very useful: e.g. How much did you spend on accommodation; food and drink services; and local transport services?

Example Foreign Affiliate Statistics Questions

Below is an extract of questions adapted from a Zambia FDI/FATS questionnaire aimed at direct investment businesses. It is of note that the Zambia questionnaire is a joint venture of the Bank of Zambia, The Central Statistical Office, and the Zambia Development Agency and issued under the authority of BOZ, CSO and ZDA Acts of Parliament.

Selected Questions

Please tick the appropriate currency you will use in completing this questionnaire. If your data are in other currencies use the table of exchange rates to convert them to national currency.

Α

Enterprise name	Currency of reporting	
	National Currency US Dollar Unit	

Reporting period:

The questionnaire asks for data on a calendar year basis. If your financial year is different, then indicate the period on the form. When you submit data, provide estimates for the calendar year based on your knowledge of the business.

Residency:

The survey focuses on **residency** and not nationality. Your company is a resident enterprise, if it has been operating or intends to operate in this country for a year or more, regardless of nationality. Non-resident enterprises or individuals live or operate (or intend to live or operate) outside this country for a year or more. A special case is International Organisations and embassies which are not deemed to be resident in countries where they are located.

B General Information

Details of Reporting Enterprise

1.1 Enterprise name:			1.2. Date of establishment of your enterprise:			
1.3. Previous name (if name has	s changed):	1.4. Date of con	nmencement of operations:

GNS/W/120 Services list for trade negotiations

The GNS/W/120 services trade negotiating list was last revised in July 1991. It is not a statistical classification of service products as such. Although a correspondence was made to the UN Central Product Classification (CPC) Provisional version at the time, technology and the organisation of service provision have evolved. Statistical classifications of services have also evolved in their wake. For this and other reasons the correspondence to current balance of payments (EBOPS 2010) and industry/activity (ISIC revision 4) classifications are in certain cases only approximate or incomplete.

To find the best correspondence for a particular sector the reader is referred initially to the explanatory notes in MSITS 2010 (UN et al), (ISIC Revision 4) UN, and CPC Version 2.0 (UN). Particular questions may also be sent to <u>Statistics@wto.org</u> for advice.

The GNS/W/120 list is set out below for reference.

SERVICES SECTORAL CLASSIFICATION LIST

Note by the WTO Secretariat

The secretariat indicated in its informal note containing the draft classification list (24 May 1991) that it would prepare a revised version based on comments from participants. The attached list incorporates, to the extent possible, such comments. It could, of course, be subject to further modification in the light of developments in the services negotiations and ongoing work elsewhere.

SERVICES SECTORAL CLASSIFICATION LIST
